

USMAN OGUNNAIKE

Full-Stack JavaScript Developer | B.Eng Electrical & Electronics Engineering (2:1)

Lagos, Nigeria • +234 813 156 1562 • ogunnaikeusman17@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Full-Stack JavaScript developer and B.Eng graduate in Electrical & Electronics Engineering (Second Class Upper, 2:1) from Olabisi Onabanjo University. Combines a strong engineering foundation with hands-on experience building production-grade, real-time web applications using React, Node.js, and MongoDB. Demonstrated ability to architect and ship complete products — from database design and RESTful APIs through to responsive, accessible user interfaces. Passionate about writing clean, scalable code and solving real-world problems with technology.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS

Databases & APIs: MongoDB, Mongoose, REST APIs, GraphQL, WebSockets (Socket.io)

Auth & Security: JWT Authentication, bcrypt, role-based access control, session management

Tools & Platforms: Git, GitHub, Vite, Cloudinary, Nodemailer, Render, Vercel, MongoDB Atlas

Engineering: Electrical circuit analysis, electronics systems, signal processing (B.Eng background)

PROJECTS

StoneChat — Real-Time Chat Application — *React · Node.js · Express · MongoDB · Socket.io*

A fully featured, production-deployed chat platform built end-to-end as a solo project. Live at stone-chatapp.vercel.app

- Architected a real-time messaging system using WebSockets (Socket.io), supporting instant delivery, typing indicators, and online presence
- Implemented JWT-based authentication with 7-day token expiry, idle session timeout, and automatic token refresh
- Built a full admin panel with user management, message moderation, dashboard analytics, and real-time charts (Recharts)
- Integrated Cloudinary for media uploads (images, videos, documents) with inline preview and native download
- Engineered friend request system, message deletion (self and both-sides), and real-time notifications
- Deployed backend on Render with MongoDB Atlas and frontend on Vercel; configured CORS, environment secrets, and uptime monitoring
- Designed fully responsive UI with mobile-safe-area support for Safari and progressive enhancement across all screen sizes

Eldorado — Real Estate Platform — *React · Next.js · Tailwind CSS · Framer Motion · Rest API*

Developed a modern, interactive real estate web application focused on property discovery, vendor onboarding, and seamless user experience.

- Built dynamic property listing interfaces with advanced filtering, search, and responsive grid layouts
- Implemented animated UI interactions using Framer Motion, including scroll-based transitions and interactive components
- Designed and developed authentication flows for agents and tenants, including protected routes and role-based UI states
- Integrated Rest APIs for data fetching, mutations, and real-time-like UI updates
- Developed reusable components such as property cards, modals, and navigation systems for scalability
- Engineered vendor onboarding flow with progressive data collection and profile management
- Optimized performance and UX with lazy loading, code splitting, and mobile-first responsive design

Poolside Africa — Digital Finance Platform — *React · Node.js · REST APIs*

Contributed frontend development to a fintech platform enabling community savings, crowdfunding, and reward-based financial tools aimed at underserved Nigerian communities.

- Developed responsive UI components with a focus on accessibility and intuitive UX for non-technical users
- Collaborated on REST API integration and state management across complex user flows
- Contributed to financial inclusion features supporting group savings and peer-to-peer funding

WORK EXPERIENCE

Software Development Intern | [SQI College of ICT](#)

2024 – 2025

- Built and maintained real-world web applications using modern JavaScript frameworks and tools
- Collaborated with senior developers on full-stack projects, applying industry best practices in version control, code review, and agile workflows
- Strengthened skills in React, Node.js, and MongoDB through structured mentorship and project delivery

EDUCATION

B.Eng Electrical & Electronics Engineering

2018 – 2023

[Olabisi Onabanjo University, Ago-Iwoye, Ogun State](#)

Second Class Upper (2:1) — Final grade reflects strong analytical and problem-solving ability developed alongside self-taught software engineering skills.

CERTIFICATIONS & TRAINING

- Software Development Training — [SQI College of ICT \(2024–2025\)](#): Full-stack web development, React, Node.js, databases
- Self-directed learning via MDN Web Docs, freeCodeCamp, and building production applications
